

Allied Consulting helps clients understand how to design new business models and leverage the latest technology to enhance business operations and create values.

Established since 1987, we have been blazing a trail of progress in the IT and Business Consulting market in the region. We provide an extensive range

of integrated Business Solutions and Consulting Services to our clients in different market segments and in various industries. Our consulting practice constitutes a task force of international consultants with strong business knowledge, deep technical know-how, project management and business process skills needed to develop strategic and practical solutions and delivery quality services. We work towards achieving long term relationship with our clients.

We bring with us innovative business solutions to link strategy, process, people, and technology combined with our strong industry knowledge and proven methodology. Our implementation, result-driven focus will help attain superior results that meet your business objectives.

Business Process Alignments— Innovative and transformation of various business functions and back office operations, including shared services, business process improvement and re-engineering. Recommendation and adoption of Industry Best Practices to improve business efficiency and enhance operational productivity. We also help our clients enabling change within organisations through developing of performance management measurements such as Key Performance Indicators (KPI), Strategic Enterprise System (Balanced Scorecard), and functional capability development.

Business Applications—Information technology strategies, infrastructure and the selection and implementation of related back-office system such as financial, distribution, manufacturing, project accounting, and human resource in Enterprise Resource Planning (ERP) applications. We leverage with a number of business partners (such as Oracle, Compiere and Microsoft) to provide our clients with leading edge business applications to support their critical business operations. We assist our clients optimising the enterprise resources through office automation and the deployment of enterprise wide self-serve tools and internet applications.

Business Intelligence— We provide services that fully leverage the internet in business and integrating business solutions that support individual processes (such as ERP, CRM, SCM, SEM, etc.) to provide an organisation the flexibility to drive productivity and profitability. These includes developing and implementing business intelligence strategies and data warehouse design with deployment.

In the new dynamic economy, there is one class of intangible assets that stands apart from all others: clients. Every leading company has a strategy for attracting, retaining and delighting this most critical asset. At Allied Consulting, our relentless focus on serving our clients is incorporated into everything we do.
