

# Business Applications Oracle Solutions

## Why choose Allied Consulting to facilitate your Oracle implementation?

### Consider the following:

- Strong and lasting commitment to Oracle services
- Broad, proven enterprise application implementation experience
- Deep technical skills and resources
- World-class implementation methodologies and tools
- Global integration of related disciplines

We can help you reach your objectives faster and with less disruption to your organisation. This means a quicker return on your investment and the ability to leverage Oracle's capabilities faster.

## Oracle Solution Offerings

In the Asian Pacific region, Allied Consulting is the leading Oracle implementers with around 25 consultants experienced in implementing various Oracle products including:

- Oracle Financials suite
- Oracle Distribution suite
- Oracle Manufacturing suite
- Oracle Human Resource / Payroll
- Oracle Projects suite

Besides providing Enterprise Resource Planning (ERP) solutions, we also offer solutions coupled with Online Analytical Tools (OLAP), Business Intelligence, Customer Relationship Management and customised solutions using various Oracle development tools.

### Learn how this provides our clients with unique benefits, including:

- Direct, immediate access to product information and specific technical expertise
- Timely assistance with technical issues relating to the implementation
- Advanced notice of product upgrades and enhancements

Take advantage of our other complementary solutions such as eBusiness Integration, Customer Relationship Management, Supply Chain Management, Business Process Alignment, Outsourcing and Strategic Enterprise Management, to maximise your Oracle investment.

You can be confident that we understand not only how Oracle's products are designed to function, but also how to optimise their day-to-day performance in your specific environment.

### Attending to the Details

Jump-start your implementation with Allied Consulting Oracle Practice. Here, our experienced team members can conduct development and testing, demonstrate the latest releases of Oracle's products on various hardware and network platforms, and work through systems design and implementation plans in advance. When it comes to the actual implementation, this will save time and money and minimise disruptions.

### A World of Experience

Leverage our consultants' experience from more than 40 of Oracle implementations across a variety of industries, including public sector, financial services, manufacturing, communications, entertainment and, in recent years, a wave of emerging dot.com companies. We have deployed Oracle solutions in companies with single locations and in global enterprises with dozens of locations across multiple borders and time zones.

Take advantage of our experience in implementing other types of enterprise applications as well. Why is this important? Certain issues - particularly those relating to organisational structure, change management and even integration with third-party products - arise regardless of the solution being deployed. Let us guide your implementation to avoid reinventing the wheel and falling prey to costly and time-consuming mistakes.

Learn how our Oracle Implementation Toolset incorporates industry best practices to manage risk which results in the smoothest possible implementation. For example, with our innovative estimating tool, we define the initial scope, cost, duration and resources of your project and continually refine these elements as the project unfolds. The parameters used in this tool are based on past experience with Oracle implementations, and they are updated continuously as additional data becomes available from new engagements.

Our integrated work plan comprehensively addresses all aspects of the implementation, regardless of industry and module. Yet it is flexible enough to adapt to the specific needs of your organisation.

Our knowledge sharing tools, such as KnowledgeBase™ and the Industry Best Practices™ library, provide additional insight into the implementation process. Since, from the earliest stages of the project, our focus is on transferring knowledge to your people, these knowledge-sharing tools are critical. When our job is complete, your people will be equipped with the knowledge, training and tools to operate and maintain the Oracle solution over time.

Discover also how we encapsulate Oracle implementation methodologies within our broader Architected Implementation Methodology (AIM) framework. This ensures that we design a solution that addresses all key factors affecting your business, both internally and externally. And it helps us achieve the appropriate balance between strategy, people, processes and technology to ensure that the technology is truly an enabler of new opportunities for your organisation.

### Beyond the Scope

Enterprise applications impact virtually every area of an enterprise, directly or indirectly. The Oracle solution you have chosen will mean fundamental changes in the way your organisation conducts business. To ease the transition to the new environment, we can also deliver seamless integration with our professionals in other vital areas, including accounting, corporate finance, human capital services, tax, valuation and a host of others.

### We make the Difference

Look closer at the advantages of our Oracle implementation approach. Ask for details on how we have helped other clients overcome complex and interesting implementation challenges. From design and development through deployment and ongoing operations, we can help you make the right decisions for your organisation - both for now and for the future. Trust Allied Consulting as your implementation partner so you can quickly enjoy full rewards of your Oracle solution.
